

AURiS - AUSCULTATION APP AND STETHOSCOPE

PRODUCT NUMBER: 1884

DESCRIPTION:

AURiS is a **simulated stethoscope to practice auscultation with realism**. It works as a hybrid simulator that can be used with mannequins and standardized patients. The sound library is remotely controlled by the AURIS auscultation training application.

AURiS uses advanced sensor technology with the app's internal sound library, which **includes heart, lung, bowel, and noise sounds in a simple instructor interface**.

CHARACTERISTICS:

REALISTIC AND REAL:

- ☑- Heart, Lung, Bowel and Bruit sounds all included. The student only hears sounds when the stethoscope is placed on the body.
- ☑- Looks like a stethoscope, sounds like a stethoscope
