

# BONNIE BONE MARROW BIOPSY

PRODUCT NUMBER: 1889

## DESCRIPTION:

Bonnie Bone Marrow Biopsy Skills Trainer™ is a first-of-its-kind patient simulator. Bonnie was designed with clinician input to replicate, teach, and reinforce the skills needed to perform a posterior iliac crest bone marrow biopsy procedure.

## SKILLS:

- ☐- This task trainer incorporates a life-size scale and anatomy for patient simulation modeled from an average size female pelvis and lower spine.
- ☐- The outer shell of this anatomical healthcare model provides a soft, tissue-like feel to allow for the palpation of underlying bony landmarks such as the spinous process, and the anterior and posterior iliac crests to facilitate proper biopsy needle placement.
- ☐- The innovative design also includes a replaceable puncture site skin insert to allow for multiple needle punctures. Inserts are available as replacement parts.
